General Comment

Please incorporate contraception into preventative health care service, at no cost to patients.

Contraception is part preventive care for women, and access to wide-ranging contraceptive care is in the best interest of women's health, children, and our communities.

Support cost-sharing for preventive care services like contraception.

Unnecessary and unreasonable delays in access to contraceptive care as preventative health services only hurt the well being of the poorest families in our communities.

We need your help to ensure access to family planning services in the dawn of health care reform for women, families and communities.

Thank You,

Alicia Mardini
